HATCHERIES
RESEARCH CENTERS
AQUARIA & ZOOS
AQUACULTURE FACILITIES
REPRO & BROODSTOCK
HUSBANDRY

ISO CERTIFICATION: 9001:2015 N° CA-1.092. ACCREDITED LABORATORY N° 046/GA/SA680A

PRODUCT: ARTEMIA ARAL CYSTS

DESCRIPTION:

Selected *Artemia salina* cysts harvested from highly productive, contaminant-free environments within the Aral Sea. The reduced size of hatching nauplii (instar 1), as well as their high $\Omega 3$ and $\Omega 6$ content and good essential amino acids profile, make it an ideal food for aquaria, aquariology, fresh or saltwater fish larvae and crustaceans. The combination of nauplii with concentrated microalgae (Technical Sheets N°. 472-476) ensures the complete nutrition of the cultivar, resulting in optimum growth and vitality of the crop.

10% DISCOUNT FROM REGULAR PRICE
