PRODUCT

MICROALGAE MIX

DESCRIPTION

Microalgae mix including **five marine microalgae**, suitable for the nourishment of most bivalve molluscs and crustaceans. Provides a broad particle size range (3-16 μm), ensuring an **optimal nutritional profile** and increasing **growth** rates and **survival**. One liter of this diet can replace up to 1800 liters of high density microalgae culture. Produced and packed in sterile conditions, it ensures a complete nutrition, enhancing growth and the vitality of the cultivar. Allows for the **reduction** in **operational costs** by diminishing on-site microalgae production requirements, and makes year-round larval production feasible.

TECHNICAL PROFILE

Parámetros nutricionales							
Protein	Carbohydrates	Lípidos	EPA	ARA	Vitamin C	Chlorophyll A	Cell density
51%	22%	16%	[16%]	[10%]	0,50%	0,83%	2.000x10 ⁷ /mL

DESTINATION AND USAGE RECOMMENDATIONS

Microalgae included in the diet: *Isochrysis*, *Tetraselmis*, *Pavlova*, *Thalassiosira* and *Nannochloropsis* spp. Dry weight 18%. We recommend the supply of microalgae several times a day (>6) in order to ensure their constant consumption by the cultivar.

REFERENCE PRICE

Quotations depend on purchase volume and payment conditions. For further information, please contact our Commercial Office at ventas@acuinuga.com.

AVAILABILITY

Delivery time: 15 working days from order confirmation.

ADDITIONAL INFORMATION

Microalgae mix can be stored refrigerated at a temperature of -2 to 6 °C, for 10-12 weeks, maintaining their nutritional qualities unchanged.
